

## *Volunteer Opportunity for our Esteemed Members of the Science Community...*

The Pioneer Charter School of Science is a high-performing charter school serving low-income families from Chelsea, Everett, and Revere. Many of our students have very little exposure to academia and will be the first in their families to attend college. Therefore, our mission is to expose them to leaders within the academic world in their surrounding neighborhoods to encourage them to maintain high standards for their own academic and professional future.

We are currently seeking judges who work in the fields of science or math for our annual **Science Fair**, and we would be most honored if you would consider participating. The details of the event are below:

**Date:** April 15, 2011

**Time:** 10am – 1pm

**Location:** Pioneer Charter School of Science (Gymnasium)

51-59 Summer Street

Everett, MA 02149

**Description:** Judging will take place for about 3 hours, beginning at 10:00am. We will provide you with a brief orientation, clear guidelines, and a form for judging projects. You will judge display boards that students have created and question them about their projects. Breakfast, coffee, and lunch will be provided.

Science projects are often the first experiences that inspire students to become professional scientists. Come and see what interests the scientists of tomorrow! The students and administration would appreciate your support.

Please contact us if you are available to judge or if you have any questions about the event. Also, feel free to pass the invitation along to any colleagues that you feel may be interested in participating.
